## Subject Index

### Rothamsted Research

Rothamsted Research (1972) *Subject Index* ; Rothamsted Experimental Station Report For 1971 Part 2, pp 201 - 203 - DOI: <https://doi.org/10.23637/ERADOC-1-6>

## SUBJECT INDEX

- Absolute density of soil  
at Rothamsted, Saxmundham and Woburn, 127
- Agdell  
experiments 1848–1970, 38  
grass experiments 1958–70, 43  
potassium in soils, 29
- Anhydrous ammonia for grass leys, 98, 101
- Barley  
effect of farmyard manure and fertilisers on, 69  
effect of rotations on yield, 150  
effect of weather on yield, 123  
nutrient composition of, 151, 160  
pests and diseases at Broom's Barn, 150  
relative response to NPK, 72  
yields at Broom's Barn, 149–154, 159  
yields at Saxmundham, 123
- Barnfield  
calcium carbonate in, 21  
cropping on, 5, 9  
cultural qualities of, 8, 34  
drainage on, 8, 9, 34  
free iron oxide in soils, 21, 35  
loess in, 13, 21, 26, 33  
mineralogy of, 24–29  
organic carbon in soils, 21  
pan formation on, 9, 13  
particle-size distribution in soils, 16–21  
potassium release from soil clay, 29  
relief of, 5  
soil analysis, methods used, 10  
soil classification, 8  
soil composition, 16  
soil erosion, 8  
soil microstructure, 11, 12–16  
soil pH, 21  
soil profile descriptions, 36–37  
soil profile morphology, 11  
soil profiles and land use, 5  
soil sampling, methods used, 9  
stones, types and distribution, 16  
variability in soils, 11, 32  
'White books' on, 8, 9
- Broom's Barn  
barley yields at, 149–154, 159  
crop rotations at, 149, 155  
crop yields at, 150, 156  
fertilisers, effect of at, 155–164  
nutrient balance in rotations, 151  
soils, 149, 155, 156, 162  
sugar-beet yields at, 149–154, 158  
wheat yields at, 159
- Bulk density of soils,  
at Saxmundham and Rothamsted, 127, 128  
effect of herbage crops on, 135
- Cereals  
responses to N after grass ley, 117  
yields after herbage crops, 116, 135  
*See also* Barley, Oats, Wheat
- Chalky boulder clay in Suffolk, 143
- Clay-with-flints, 5, 13, 16, 18, 28, 29, 32–35
- Clay mineralogy of Barnfield, 28
- Clover  
cereal yields following, 116  
composition of, 110  
effect of weather on, 113  
fertilisers for, 101  
N content of, 103  
nutrient uptake by, 111  
yields at Saxmundham, 102, 114
- Clover-grass leys  
effect of farmyard manure and fertilisers on, 69  
effect of N fertilisers on, 106  
effect of P and K fertilisers on, 101, 105  
effect of weather on, 111  
relative response to NPK fertilisers, 72  
yields and N content of, 103  
*See also*: Grass; Herbage
- Cropping, effect of soil physical properties on, 9, 34
- Cultivation, soil structure and, 122
- Drainage at Saxmundham, 130, 139
- Farmyard manure  
chemical analyses of, 78  
comparison with NPK fertilisers, 83  
effect on sugar beet, 69, 83, 158  
effect on cereals, 69, 159  
recovery of N, P and K from residues, 84
- Grass  
anhydrous ammonia for, 98, 101  
cereal yields after, 116  
chemical composition of, 107  
comparison of farmyard manure and NPK for, 70, 83  
effect of N fertilisers on, 98, 106  
effect of PK fertilisers on, 101, 105  
effect of weather on yields, 111  
experiments at Saxmundham, 95–121  
experiments on Agdell, 43  
fertilisers for, 95–121  
in Rotation I experiment at Saxmundham, 115  
liming of Park Grass, 177  
Mg content of, 109  
N content of, 100  
nutrient content of, 108  
nutrient uptake by, 109  
nutrients removed by, 46–55  
recovery of P residues by, 46–55  
relationship between yield and soil analysis, 55  
relative response to NPK fertilisers, 72  
yields and N content of, 103  
yields at Saxmundham, 97  
yields on Agdell, 43  
*See also* Clover-grass leys; Herbage
- Gypsum, effect on Saxmundham soils, 132
- Herbage  
choice of crops for sandy-clay soils, 117  
effect on soil structure, 134  
effect on yields of following cereals, 116, 135  
experiments at Saxmundham, 95–121  
*See also* Grass; Clover-grass Leys
- Hoosfield, 29
- Insect survey  
insects in light traps, 181, 183–190  
insects in suction traps, 181, 192–199  
weekly bulletins, 181
- Instability of soils in water, 127
- Leys, *See* Grass; Clover-grass leys
- Loess in Barnfield soil, 13, 21, 26, 33
- Lucerne  
composition of, 110  
effect of weather on, 113  
fertilisers for, 101  
in Rotation I experiment, Saxmundham, 115  
N content of, 103  
nutrient uptake by, 111  
yields at Saxmundham, 102, 114

## SUBJECT INDEX

- Magnesium**  
deficiency in sugar beet, 69  
effect on potatoes, 76  
effect on sugar beet, 76  
in grass, 109  
in potato tubers and sugar-beet tops, 86
- Mechanical analyses of soils, 127**  
**Mechanical slaking of soils, 127**
- Nitrogen fertiliser**  
amounts removed by crops, 78, 85  
effect of residual N on sugar beet and barley, 151  
effect of time on crop response to, 74  
effect on crops at Woburn, 69  
effect on sugar beet and barley, 150, 158  
effect on wheat, 159  
for leys, 98–101, 106
- Nitrogen in soil, amount removed by crops, 80, 85**  
**Nutrient balance of crops, 160**  
**Nutrient deficiency symptoms and crop growth, 76**
- Oats**  
comparison of farmyard manure and NPK on, 83  
effect of farmyard manure and fertilisers on, 69  
relative response to NPK, 72
- 'Pan' formation, 9, 13**
- Park Grass**  
changes in soil properties on, 177  
effect of organic matter in retaining Ca, 180  
liming of, 177
- Particle-size distribution**  
in Barnfield soils, 16–21  
in Suffolk soils, 143
- Penetrometer readings, effect of gypsum on, 132**
- Phosphorus fertiliser**  
amount removed by crops, 78, 85  
effect of time on crop response to, 74  
effect on cereals, 159  
effect on crops in Woburn Reference experiment, 69  
effect on leys at Saxmundham, 95, 101–103, 106  
effect on sugar beet, 158
- Phosphorus in soil**  
amount removed by crops, 80, 85  
methods of estimating, 39  
relationship of uptake to grass yield, 55  
recovery of by grass, 46–55  
residues in Agdell soils, 39  
soil analyses related to nutrient balances, 42
- Physical properties of soils at Rothamsted, Saxmundham and Woburn, 125**
- Pore space of soils at Saxmundham, 127–129**
- Potassium fertiliser**  
amount removed by crops, 78, 85  
effect of time on crop response to, 74  
effect on cereals, 159  
effect on crops in Woburn Reference experiment, 69  
effect on leys at Saxmundham, 95, 101–103, 106  
effect on sugar beet, 158
- Potassium in soil**  
amount removed by crops, 80, 85  
methods of estimating, 39  
recovery of by grass, 46–55  
relationship of uptake to grass yield, 57  
residues in Agdell soils, 39  
soil analyses related to nutrient balances, 43
- Potassium release from soil clay, 29**
- Potatoes**  
effect of farmyard manure and NPK on, 69, 83  
effect of Mg on, 76  
Mg in tubers, 86  
relative response to NPK fertilisers, 72
- Rothamsted soils compared with Saxmundham, 124**
- Saxmundham**  
changes in soluble nutrients in soils, 105  
crop yields at, 123  
cultivation and soil structure, 122  
drainage at, 130, 139
- effect of gypsum on soils, 132  
effect of soil conditioners on soils, 133, 138  
Herbage crops experiments at, 95–121  
N content of crops at, 100, 103  
physical properties of soils, 125  
Rotation I experiment, 115, 122, 125, 128, 135, 143, 152  
soil analyses, 105, 106, 148  
soil classification, 8  
soil management, 138  
soil structure, 122–142  
soils compared with Rothamsted and Woburn, 124  
soils of Saxmundham Field, 143  
weather at, 112, 122  
working properties of soils, 146  
yields and N content of leys, 103  
yields of clover and lucerne, 102
- Soft fruit, effect of fertilisers and farmyard manure on, 69**
- Soil analysis methods, 10, 162**  
**Soil classification at Saxmundham and on Barnfield, 8**  
**Soil conditioners**  
effect on lettuce yields, 134  
effect on Saxmundham soils, 133, 138
- Soil erosion on Barnfield, 8**  
**Soil microstructure, 11, 12–16**  
**Soil mineralogy on Barnfield, 24**  
**Soil organic matter**  
effect on retention of Ca, 180  
effect on water-holding capacity, 130  
soil structure and, 140
- Soil profile morphology on Barnfield, 11**  
**Soil sampling methods, 9**  
**Soil series**  
Ashley, 149  
Batcombe, 5, 12, 28, 29, 32, 33  
Beccles, 143  
Charity, 8, 12, 33  
Nettleton, 8, 12  
Winchester, 5
- Soil structure**  
at Saxmundham, 122–142  
criteria of good, 137  
cultivation and, 122  
effect of gypsum on, 132  
effect of herbage crops on, 134  
effect of soil conditioners on, 133, 138  
modern views on, 136  
organic matter and, 140  
stabilisation of, 137
- Soil survey in Suffolk, 143**
- Stones, types and distribution of on Barnfield, 16**
- Sugar beet**  
effect of fertilisers and farmyard manure on, 69, 83, 158  
effect of Mg on, 76  
effect of N fertiliser on yield, 150  
effect of rotations on yield, 150  
effect of weather on yield, 123  
K fertilisers for, 154  
Mg deficiency, 69  
Mg content of tops, 86  
nutrient composition of, 160  
nutrients in crops at harvest, 151  
pests and diseases of, 149  
relative response to NPK fertilisers, 72  
yields at Broom's Barn, 149–154, 158  
yields at Saxmundham, 123
- Suffolk**  
chalky boulder clay in, 143  
soil survey in, 143
- Water-holding capacity of soils**  
at Saxmundham, Rothamsted and Woburn, 129  
effect of organic matter on, 130
- Wheat**  
effect of weather on yields, 123  
Wheat Bulb fly, 165–176  
yields at Broom's Barn, 159  
yields at Saxmundham, 123

## SUBJECT INDEX

- Wheat Bulb fly  
breeding in laboratory, 171  
chemical control of larvae, 167  
diseases of, 170  
dispersal of, 169  
effect on growth and yield of wheat, 165  
egg development, 168  
egg survival, 171  
emergence of adults, 168  
forecasting yields of attacked fields, 166  
larvae survival, 172  
oviposition behaviour, 169  
population fluctuations, causes of, 173  
pupae survival, 173  
'White books', records of Rothamsted experiments, 8  
Woburn  
Reference experiment 1960-69, 69  
soils compared with Saxmundham, 125
