Rothamsted Experimental Station Report for 1972 Part 2

[Full Table of Content](#)

Subject Index

Rothamsted Research

Rothamsted Research (1973) *Subject Index* ; Rothamsted Experimental Station Report For 1972 Part 2, pp 213 - 215 - DOI: <https://doi.org/10.23637/ERADOC-1-7>

SUBJECT INDEX

- Aphids
caught in Insect Survey, 182–199
Chrysopa carnea as predator, 183
- Bare Soil, water balance of, 63
- Barley
amount of NPK removed from soil by, 121, 129, 130
effect of fertilisers on, 103, 111
effect of lime on, 103
evaporation from, 66
irrigation on, 14, 52
NPK contents of, 119
neutron meter measurements on, 5, 52
phosphate deficiency in, 118
potassium deficiency in, 118
water use by, 5, 14, 43, 52, 69
yield increases with farmyard manure, 115
yield increases with fertilisers, 112, 128
- Beans
evaporation from, 73
irrigation on, 24, 59
neutron meter measurements on, 5, 59
water use by, 5, 24, 44, 59, 71
- Cercospora herpotrichoides*. See Eyespot
- Chlordane, housefly resistance to, 168
- Chrysopa carnea*
as aphid predator, 183
diapause in, effect of photoperiod on, 210
hibernation and diapause in, 210
- Clay-with-flints soil
effect of fertilisers on crops on, 102, 111
irrigation on, 5
Ley–Arable experiments on, 131
- Clover
effect of fertilisers and lime on, 103
K deficiency in, 118
- Composition of crops, effect of K, Mg, Na and lime on, 102
- Cropping, effect on soil organic matter, 131
- DDT, housefly resistance to, 168, 169, 179
- Diazinon, housefly resistance to, 168, 169, 171
- Dieldrin, housefly resistance to, 169, 179
- Drainage, nitrate nitrogen in at Saxmundham, 166
- Evaporation
from bare soil, 64
from barley, 66
from grass, 68
from kale, 82
water balance and, 23, 28, 38, 50, 54, 56, 80
- Eyespot (*Cercospora herpotrichoides*)
effect of previous cropping on, 161, 164
effect on wheat yield, 160
on wheat at Saxmundham, 160–167
percentage of wheat straws with, 164
- Farmyard manure
amounts of NPK supplied by, 119
annual recovery of NPK from by crops, 123
chemical analyses of, 119
compared with fertilisers, 113
effect on composition of crops, 111
effect on crop yield, 115
effect on organic-matter content of soil, 148
- Fertilisers
compared with farmyard manure, 113
effect on crop composition, 102, 111
effect on nutrient reserves in soils, 86–101
- effect on soil composition, 107
interactions of NPK, 113
See also Magnesium fertilisers; Nitrogen fertilisers; Phosphate fertilisers; Potassium fertilisers
- Gaeumannomyces graminis* (formerly *Ophiobolus graminis*), See Take-all
- Grass
amounts of NPK removed from soil by, 121, 129, 130
effect of fertilisers on, 103, 111
effect of lime on, 103
effect of nitrogen on, 118
effect of permanent grass on organic carbon in soil, 136
effect of reseeded grass on organic carbon in soil, 138
irrigation for, 67
neutron meter measurements on, 64, 67
NPK contents of, 119
water balance of, 64
yield increases with farmyard manure, 115, 128
yield increases with fertilisers, 112, 128
See also Grass-clover leys
- Grass-clover leys
amount of NPK removed from soil by, 121, 129, 130
effect of fertilisers on, 111
effect on organic carbon in soil, 134
effect on soil organic matter, 131
nitrogen deficiency in, 118
NPK contents of, 119
potassium deficiency in, 118
yield increases with farmyard manure, 115, 128
yield increases with fertilisers, 112, 128
See also Grass
- Great Field, Rothamsted
fertiliser experiments on, 111
irrigation experiments on, 6
- Housefly
antagonism to insecticides, 172
cross tolerance of strains, 169
genetics of, 171
location of resistance factors to insecticides, 172
mechanism of resistance to insecticide, 174
mixed function oxygenase in, 173
penetration delaying factor of insecticides to, 175
resistance to DDT, 179
resistance to dieldrin, 179
resistance to insecticides, 169–181
SKA strain, origin of, 168
synergism to insecticides, 169, 172
- Insecticides
housefly antagonism to, 172
housefly resistance to, 168–181
mechanism of resistance of housefly to, 174
organophosphorus, housefly resistance to, 169
penetration delaying factor to housefly, 175
pyrethrins, housefly resistance to, 169
- Insect Survey
aphids in, 182–199
insects in light traps, 183, 200–207
insects in suction traps, 182, 184–199, 208–209
moths in, 200–207
neuroptera in, 183, 210
Standard Weeks used for analyses, 211
Weekly bulletins, 182
- Irrigation
at Woburn, 6

SUBJECT INDEX

- Irrigation (contd.):**
on barley, 14, 52
on beans, 24, 59
on Clay-with-flints soil, 5
on grass, 67
on Great Field, Rothamsted, 6
on potatoes, 55, 75
on sugar beet, 31
on wheat, 45
- Kale**
amount of NPK removed from soil by, 121, 129, 130
effect of fertilisers on, 103, 111
effect of lime on, 103
nitrogen deficiency in, 118
NPK contents of, 119
phosphate deficiency in, 118
water use by, 43, 79
yield increases with farmyard manure, 115, 128
yield increases with fertilisers, 112, 128
- Ley-Arable experiments**
at Rothamsted (1949-72), 131-141, 155-157
at Woburn (1938-69), 131, 141-154, 158-159
Leys *See* Grass; Grass-clover leys; Rothamsted
Ley-Arable experiment; Woburn Ley-Arable
experiment
- Lime**
effect on crops at Rothamsted, 102
effect on soil composition, 107
losses of from long-term experiments, 109
- Magnesium fertilisers**
effect on crops at Rothamsted, 102
effect on potato yields, 117
interaction with potassium, 102
- Moths caught in Insect Survey, 200-207**
- Neuroptera, 183, 210**
- Neutron moisture meter**
accuracy of, 16, 20
field installation of, 9
measurements on Clay-with-flints soil, 5
used on bare soil, 62
used on farm crops, 5-61, 65-85
- Nitrogen fertilisers**
amounts added to and removed from soil, 120, 129,
130
annual recovery of by crops, 122
effect on crop content, 111
effect on crop yield, 113
effect on nitrogen uptake in wheat grain, 162
effect on take-all in wheat, 163
effect on wheat yield, 162
- Nutrient balances in long-term experiments, 109**
- Nutrient reserves of soils, changes in, 86-101**
- Ophiobolus graminis*, *See* *Gaeumannomyces graminis*
- Organic carbon content of soil**
effect of arable-with-hay on, 144
effect of arable-with-roots on, 144
effect of cropping on, 132, 143
effect of farmyard manure on, 148
effect of grass and continuous arable on, 141
effect of leys on, 135, 143
effect of permanent grass on, 136
effect of reseeded grass on, 138
in Rothamsted Ley-Arable experiments, 132, 155,
156, 157
in Woburn Ley-Arable experiments, 141, 158, 159
rate of loss of, 136
See also Soil organic matter
- Phosphate fertilisers**
amounts added to and removed from soil, 120, 124,
129, 130
annual recovery of by crops, 122
effect on crop content, 111
effect on crop yield, 113
- Potassium fertilisers**
amounts added to and removed from soil, 120, 124,
129, 130
annual recovery of by crops, 122
effect on crop content, 111
effect on crop yield, 113
effect on crops at Rothamsted, 102
interaction with magnesium, 102
- Potatoes**
amounts of NPK removed from soil by, 121, 129,
130
effect of fertilisers on, 103, 111
effect of lime on, 103
effect of magnesium on, 117
irrigation on, 55, 75
neutron meter measurements on, 54
NPK contents of, 119
potassium deficiency in, 118
water use by, 43, 75
yield increases with farmyard manure, 115
yield increases with fertilisers, 112, 128
- Rainwater**
nutrients in at Rothamsted, 92
nutrients in at Woburn, 97
- Rothamsted Ley-Arable experiments (1949-72),
131-159**
history of experiments, 131
methods of sampling and analysis, 152
soil organic matter in, 132, 155, 156, 157
- Rothamsted Reference experiment**
comparison with Woburn Reference experiment,
99
composition of crops, 111
composition of soils, 86-93
crop yields on, 111
estimates of annual changes in nutrients, 90, 92
methods of soil analysis used, 100
nutrient balance for P and K, 91-92
nutrients supplied by rainwater, 92
soil analyses related to nutrient balances, 92
soil nutrient reserves, 86-101
- Saxmundham**
nitrate N in drainage at, 166
take-all and eyespot in wheat at, 160-167
wheat yields at, 160-167
- Sodium, effect on crops at Rothamsted, 102-110**
- Soil nutrient reserves at Rothamsted and Woburn,
86-101**
- Soil organic matter**
accumulation in soil from farmyard manure, 148
changes caused by leys, 136, 143
effects of leys and arable cropping on, 131-159
in Rothamsted Ley-Arable experiments, 132, 155,
156, 157
in Woburn Ley-Arable experiments, 141, 158,
159
maintenance of by grass and arable cropping, 141
See also Organic carbon content of soils
- Sugar beet**
irrigation on, 31
neutron meter measurements on, 5
water use by, 5, 31
- Take-all (*Gaeumannomyces graminis*)**
'decline' after several wheat crops, 165
effect of previous cropping on, 163
effect on wheat yield, 160-167
on wheat at Saxmundham, 160-167
- Water balance of soil profile, 12, 23, 28, 38, 45, 52,
63**
- Water content of soils, periodic changes in, 17, 25, 34,
45, 52**
- Water use by farm crops, 5-85**
- Weather, effect on wheat yield, 165**
- Wheat**
amounts of NPK removed from soil by, 121, 129,
130

SUBJECT INDEX

- Wheat (*contd.*):
crop growth and nitrogen losses in drainage, 166
effect of fertilisers on, 111, 162
effect of nitrogen fertiliser on, 162
effect of weather on yield, 165
effects of previous crops on, 160-167
Erysiphe graminis on, 164
eyespot and yield, 160-167
irrigation on, 45
neutron meter measurements on, 45, 65
NPK contents of, 119
Opomyza florum on, 164
phosphate deficiency in, 118
potassium deficiency in, 118
Puccinia striiformis on, 164
take-all and yield, 160-167
water use by, 43, 65
yield increases with farmyard manure, 115
yield increases with fertilisers, 112, 128
See also Take-all; Eyespot
- Woburn
irrigation at, 6
Ley-Arable experiment, 131, 141-159
nutrients in rainwater at, 97
Reference experiment, 86, 93-101
See also Woburn Ley-Arable experiment; Woburn
Reference experiment
Woburn Ley-Arable experiment (1938-69)
history of experiment, 141
methods of sampling and analysis, 154
soil organic matter in, 141, 158, 159
Woburn Reference experiment
comparison of results with Rothamsted, 99
composition of soils, 93-97
estimates of annual changes in nutrients, 96
methods of soil analysis used, 100
nutrient balance for P and K, 97
nutrients supplied by rainwater, 97
soil analyses related to nutrient balances, 97
soil nutrient reserves, 86
