Rothamsted Insect Survey

Fifth Annual Summary

L. R. TAYLOR and R. A. FRENCH

Suction traps

Aphid bulletins were issued weekly from 16 April 1973 (Bulletin No. 1) to 4 November 1973 (Bulletin No. 29). The species listed in Table 1(a-h) are those in the Bulletin and the same as in 1972.

A new trap at Rainham, Essex, commenced operation on 26 March 1973. The Zeeland trap developed a fault and did not operate from 18 April 1973 to 22 May 1973. The trap at Newcastle did not operate after 30 August 1973. Other traps were in operation at Garston, Hertfordshire, and Rothamsted Farm (two traps) but they are not included in Table 1.

Catches from Zeeland, Brooms Barn and Aberystwyth were identified by D. Hille Ris Lambers of Bladluisonderzoek T.N.O., G. D. Heathcote of Brooms Barn and J. A'Brook of the Welsh Plant Breeding Station. H. L. G. Stroyan of the M.A.F.F. Plant Pathology Laboratories confirmed difficult determinations.

The Bulletin sent out on Friday lists the aphids caught between five and 12 days previously, except Zeeland and Copenhagen which were caught 12 to 19 days previously. The Bulletin covers the working week, Monday to Sunday. Table 1 is for four Standard Week periods constant from year to year (see *Rothamsted Report for 1972*, Part 2, p. 211, Table 4).

The sample volume was halved at some sites at peak periods during the year to reduce the size of the catch, both the weekly Bulletin and Table 1 are corrected for this reduction.

In Table 1 there are no missing values; a blank records a zero catch.

Light traps

Table 2(a-f) gives the annual catches during 1971 and 1972 of the same 31 pest, or migratory, Lepidoptera as in previous years. Twenty-five new sites makes a total of 88 in the Table. At the end of 1973 160 traps are operating.

The sites in Table 2 are arranged in sequence from north to south and the species are in the same order as in previous years. Zero catches are recorded as 0; dashes indicate no records.

Voluntary workers again operated most traps and identified many of the insects; for this we are most grateful.
