The Bureau, one of ten Commonwealth Agricultural Bureaux, was established at Rothamsted in 1929. Administratively and financially the Bureau is distinct from the Station, but the two work closely together. The Director of the Station is Consultant Director of the Soil Bureau.

The function of the Bureau is to assist workers in soil science, primarily throughout the Commonwealth but also throughout the world.

Publications include:

Soils and Fertilizers—a monthly abstract journal covering the world literature of soil science, soil-plant relationships and the use of fertilisers.

Irrigation and Drainage Abstracts—a quarterly publication covering the world literature of water management and soil-plant water relations.

Annotated Bibliographies on specific subjects.

Technical Communications—monographs on specialised topics.

Special Publications on subjects of general interest.

The work of the Commonwealth Agricultural Bureaux is recorded in its own report published annually by H.M. Stationery Office.
