53/A/2

BARLEY - HOOSFIELD 1953

The 102nd year

For history, details of treatments etc. see "Results of the Field Experiments 1939-47" Vol. I, Section A/2.

Cultivations, etc.: Ploughed: Sept 19, 1952. Dung applied and ploughed in: Sept 23. Fertilizers applied: Mar 3, 1953. Seed drilled at 3 bushels per acre: Apr 9. Sprayed with D.N.O.C.: May 26. Variety: Plumage Archer.

Note: Owing to the very heavy infestation with Wild Oats (*Avena Fatua*) the whole crop was cut and carted green before the oats ripened. No yields therefore were recorded.
