BARLEY - HOOSFIELD 1958

The 107th year

For history, treatments etc., see "Details of the Classical and Long Term Experiments" 1956.

Cultivations, etc.: Ploughed: Sept 9 and again Nov 22, 1957. Dung applied: Nov 25. Fertilizers applied: Apr 17, 1958. Seed drilled at $2\frac{3}{4}$ bushels per acre: Apr 21. Sprayed with OMPP at 6 pints in 40 gallons per acre: May 28. Combine harvested: Sept 9. Variety: Plumage Archer.

In 1958 the plots were combine harvested for the first time, a single cut being made down the centre of each plot (including plots 1N and 5 - 0) for the full length, except on strips 1 and 3, where five combine cuts were taken per plot and weighed separately. The yields shown were estimated from the totals of these cuts.
