WINTER BEANS

SOWING METHODS, DATES AND SEED RATES

Object: To study the effects of drilling or ploughing in seed, on three dates and at three seed rates, on the yield of w. beans - Bones Close.

Sponsors: J. McEwen, D.P. Yeoman, R. Moffitt.

Design: 2 randomised blocks of 18 plots.

Whole plot dimensions: 6.0 x 10.0.

Treatments: All combinations of:-

1. SOW METH Methods of sowing:
 DRILL By drill sowing rows 12 cm apart
 PLOUGH Seed broadcast on soil surface and ploughed in
2. SOW DATE Dates of sowing:
 19 SEP 19 September, 1985
 17 OCT 17 October
 13 NOV 13 November
3. POPULATN Plant populations per hectare:

	Seeds sown	Plants established
120	120,000	83,000
240	240,000	167,000
360	360,000	233,000

Basal applications: Weedkillers: Simazine at 1.2 kg with propyzamide at 0.85 kg in 280 l. (SOW DATE 19 SEP also received paraquat at 0.28 kg ion applied with the other weedkillers). Fungicides: Benomyl at 0.50 kg with chlorothalonil at 1.0 kg and a wetting agent ('Agral' at 0.075 l) in 500 l and on a second occasion in 200 l. Maneb at 0.80 kg and mancozeb at 0.80 kg in 500 l. Insecticide: Deltamethrin at 0.0079 kg in 200 l on two occasions. Desiccant: Diquat at 0.60 kg ion with a wetting agent ('Agral' at 0.075 l) in 500 l.

Seed: Banner, dressed with carbendazim and thiram.

86/R/BE/2

Cultivations, etc.: - Heavy spring-tine cultivated: 12 Sept, 1985 and on two further occasions: 18 Sept. Discd: 19 Sept. SOW DATE 19 SEP plots rotary harrowed, seed sown or broadcast, broadcast plots ploughed: 19 Sept. Weedkillers applied to SOW DATE 19 SEP: 30 Sept. SOW DATE 17 OCT plots rotary harrowed, seed sown or broadcast: 17 Oct, broadcast plots ploughed: 18 Oct. Weedkillers applied to SOW DATE 17 OCT: 24 Oct. SOW DATE 13 NOV plots rotary harrowed, seed sown or broadcast, broadcast plots ploughed: 13 Nov. Weedkillers applied to SOW DATE 13 NOV: 14 Nov. Insecticide applied: 1 May, 1986 and 19 May. Benomyl with chlorothalonil and wetting agent applied: 30 May, 16 June. Maneb and mancozeb applied: 18 July. Desiccant with wetting agent applied: 17 Sept. Combine harvested: 22 Sept. Previous crops: W. wheat 1984, s. barley 1985.

NOTE: Plant emergence counts were made. Numbers of stems and plants were counted in April. Flowering dates were recorded, chocolate spot, rust and lodging were assessed. Components of yield were measured at maturity.
