TWO COURSE ROTATION

Cumulative Effects of Agricultural Salt

Rothamsted 1949

Object of the experiment: To test the cumulative effects of agricultural salt and muriate of potash, and to compare two methods of application of the salt.

Rotation: Sugar beet followed by barley.

System of replication: For each crop 4 blocks of 12 plots. Second order interactions partially confounded with blocks.

Area of each plot:

Series 1, Barley: 0.02072 acre

Series 2, Sugar beet: 0.02000 acre (harvested area, 0.01733 acre).

Treatments:

All combinations of:

- (1) Agricultural salt: None, $2\frac{1}{2}$, 5 and $7\frac{1}{2}$ cwt per acre applied to sugar beet.
- (2) Muriate of potash: None, the equivalent of half the single dressing of salt (approximately 1 cwt K20 per acre), the equivalent of the single dressing of salt (approximately 2 cwt K20 per acre), applied to sugar beet at sowing.
- (3) Time of application of salt: Before ploughing in winter, in seed bed at sowing.
- (4) Salt applied to sugar beet only, salt repeated at half rate on barley.

Note: treatment (3) applies to both sugar beet and barley crops; the barley receives no potash treatment.

Basal dressings, applied to all plots at sowing:
Barley: 0.3 cwt N per acre as sulphate of ammonia
Sugar beet: 0.8 cwt N per acre as sulphate of ammonia
0.6 cwt P₂O₅ per acre as superphosphate.

Cultivations, etc.:

Barley. Series 1. Long Hoos VII.

Agricultural salt applied: Dec 16. Ploughed: Dec 29-30. Springtined: Feb 25. Sulphate of ammonia applied: Feb 26. Harrowed: Mar 4. Seed drilled, agricultural salt applied, harrowed in: Mar 11. Hand cut thistles: June 14, 15, 21. Harvested: Aug 8, 9. Variety: Plumage Archer. Previous crop: Sugar beet.

Sugar beet. Series 2. Long Hoos V.

Agricultural salt applied: Sept 23. Ploughed twice: Sept 24-25,

Dec 28-29. Springtine harrowed: Feb 26. Cultivated: Mar 30.

Harrowed: Apr 1. Ring rolled: Apr 2. Agricultural salt and muriate

49/Ba/1.2

of potash applied, seed drilled: Apr 11. Sulphate of ammonia applied: Apr 12. Superphosphate applied, harrowed in: Apr 13. Rolled: Apr 14. Hoed: May 17 - July 2. Singled: May 31 - June 2. Lifted: Nov 26-29. Variety: Klein E. Previous crop: Barley.

Standard errors per plot:
Barley, grain, 2.06 cwt per acre or 7.6%
Sugar beet, total sugar, 1.92 cwt per acre or 6.7%
tops, 0.609 tons per acre or 8.2%

All standard errors from 22 degrees of freedom.
